Critical Thinking, Problem Solving and Decision Making Techniques

Code: PS28 From: 28 October - 1 November 2024 City: Boston (USA) Fees: 5700 Pound

Introduction

We are continuously confronted with problems that require us to make decisions. Most decisions are reached without requiring any complex decision-making process: We're hungry? We decide to eat. Some problems are more complex, like deciding how to prioritize our work, or understanding why a process failed and deciding what to do about it; these require a rational approach to problem-solving. Often, things get even more complicated, or our decisions could have an important impact on our lives, careers, or the lives of those around us; that is where we must have the ability to think critically and make sure there is no flaw in our logic. At other times the problem is so unusual that it defies rational and critical thinking; these are the times when creative problem-solving becomes an invaluable tool.

In this course, we will cover all these important thinking approaches. After understanding the thinking mechanisms, we will provide you with methods and tools that you will practice during the sessions and that can help you at work or in life, and from the most mundane situations to the most difficult or unusual ones.

Course Objectives of Best Practices in Problem Solving, Decision-Making & Creativity

- Build and expand decision-making, critical thinking, and creative problem-solving skills.
- Apply logical and creative approaches to solving problems and making decisions.
- Use traditional and creative tools for identifying causes and generating solutions.
- Employ creativity and lateral thinking as business tools.
- Analyze and solve actual problems facing them at work.
- Demonstrate and build credibility with upper management.
- Develop strategic approaches to problem solving and decision-making.

Best Practices in Problem Solving, Decision-Making & Creativity Course Outlines

Day 1

Problem-solving and decision making

- Definition of 'problem'.
- Definition of 'problem-solving'.
- Definition of 'decision making'.
- Creative problem-solving and decision-making.
- The helicopter view.
- Problem diagnosis.
- Defining the opportunity or problem.
- The link between causes and symptoms.

A chessboard with several pawns in the foreground, including a gold king and a silver pawn. The board is set on a checkered surface with a circular pattern of light rays emanating from behind the king.
