## Blackbird Project Management Professional

Code: PM28 From: 9 - 13 March 2026 City: Boston, Massachusetts (USA) Fees: 5700 Pound

### Introduction

In today's fast-paced, highly technical, and dispersed workplace, your ability as a project manager to demonstrate best practices in project management—both on the job and through professional certification—is essential to staying competitive. The skills and knowledge you gain in this course will help you avoid costly mistakes and enhance your competitive edge. This course aligns with the generally recognized practices of project management as defined by the Project Management Institute PMI®. By mastering these practices, you will be prepared to effectively manage projects, reduce risks, and improve your project's success rate. Whether you're aiming to achieve Project Management Professional PMP certification or simply enhance your skills, this course will empower you to become a more effective project manager.

### Course Objectives

By the end of this course, you will be able to:

- Define project management fundamentals, including key terms and concepts.
- Understand project management within the organization, including its role and structure.
- Define the project management methodology, including the processes, tools, and techniques involved.
- Initiate a project successfully and develop a clear project charter.
- Plan a project management plan, including planning for scope, time, costs, quality, resources, and risk.
- Execute a project by managing stakeholders and ensuring smooth workflow.
- Monitor project work and adjust scope, schedule, costs, and risks as necessary.
- Control project changes, ensuring alignment with the original plan and goals.
- Close a project by assessing its outcomes and documenting lessons learned.
