Supply Chain Leader Development Program

Ref: 321616_149402 **Date:** 16 – 20 August 2027 **Location:** Boston, Massachusetts (USA) **Fees:** 5900 GBP

Introduction

In today's business world, effective leadership in Supply Chain Management is a key factor in determining an organization's success. This Supply Chain and Leadership Development Program offers a unique opportunity to develop essential skills to manage supply chains effectively, understand the importance of supply chain risk management, and enhance leadership abilities within teams. Through this course, participants will gain a deep understanding of the core principles of Supply Chain Management, how to implement these strategies to improve performance, and how to leverage leadership power to foster collaboration and innovation within their teams.

The Supply Chain Leadership Program is designed to help participants effectively manage both the operational and leadership aspects of supply chains, as well as understand the role of procurement, inventory management, and risk mitigation. This course will also explore the critical leadership styles and transformation strategies that can elevate personal leadership skills and foster high-performing teams.

Course Objectives

- Understand the principles of Supply Chain Management and learn how to apply them effectively within your organization.
- Learn about global supply chain trends and the importance of innovation in today's supply chains.
- Identify the challenges within supply chain management and develop strategies for overcoming them.
- Develop lean and green strategies for optimizing your supply chain processes.
- Appreciate the role of procurement and inventory management in supply chain efficiency and cost reduction.
- Explore various leadership styles and strategies for transformation in supply chain management.
- Learn how to build strong collaborative teams within your organization.
- Understand how to use your personal leadership power to foster strong relationships and influence within teams.
- Utilize the performance management process to optimize team output and achieve organizational goals.
- Implement the 4D Management Model Direct, Delegate, Develop, Deliver for effective leadership and decision-making.
