Safety/Occurrence Investigation

Code: AV28 From: 26 - 30 August 2024 City: Kuala Lumpur (Malaysia) Fees: 4400 Pound

Introduction

Welcome to the Safety/Occurrence Investigation course! In this comprehensive program, we will explore the essential aspects of conducting safety and occurrence investigations in various industries. Safety and occurrence investigations play a crucial role in identifying the causes and contributing factors of incidents, accidents, and near-misses, enabling organizations to enhance safety measures and prevent future occurrences.

Objectives

- Understand the importance of safety/occurrence investigation: Gain a deep understanding of the significance of safety and occurrence investigations in promoting safety, preventing accidents, and improving organizational performance.
- Learn fundamental concepts and principles: Familiarize yourself with the key concepts, terminology, and principles related to safety and occurrence investigations, including legal and regulatory frameworks.
- Master investigation techniques and methodologies: Acquire the necessary skills and techniques for conducting effective safety and occurrence investigations, including evidence collection, witness interviews, data analysis, and report writing.
- Explore root cause analysis: Understand the principles and techniques of root cause analysis and its application in safety/occurrence investigations, enabling you to identify underlying causes and contributing factors.
- Enhance critical thinking and problem-solving skills: Develop critical thinking and problem-solving skills to analyze complex incidents, evaluate evidence, and make sound recommendations for preventing future occurrences.
- Conduct effective interviews: Learn effective interview techniques to gather accurate and relevant information from witnesses and stakeholders during the investigation process.
- Develop comprehensive investigation reports: Gain insights into the structure and content of investigation reports, including best practices for documenting findings, conclusions, and recommendations.

Course Outline

Day 1

- Introduction to safety/occurrence investigation
- Importance and benefits of conducting investigations
- Legal and regulatory frameworks

Day 2

- Key concepts and terminology in safety/occurrence investigation
- Investigation planning and preparation
- Evidence collection and preservation

Day 3

- Interview techniques and skills
