Public Sector Pension Policy and Compensation Packages

Code: HR28 From: 26 August - 6 September 2024 City: Kuala Lumpur (Malaysia) Fees: 7000 Pound

Introduction

The management of public sector pension policies is of paramount importance in ensuring the financial security and well-being of public sector employees during their retirement. This comprehensive course combines the topics of "Public Sector Pension Policy" and "Compensation Packages and Payrolls Structures" to provide a modern, advanced introduction to both subjects. Participants will gain a deep understanding of public sector pension policy and learn how it intersects with employee reward systems. The course aims to equip participants with the knowledge and skills necessary to navigate the complexities of public sector pension policy and design effective compensation packages in alignment with organizational goals.

Course Objectives

- Understand the key concepts, principles, and challenges of public sector pension policy.
- Explore the elements and purposes of reward systems from both organizational and employee perspectives.
- Compare and evaluate different types of salary and pay structures in the context of public sector pension policy.
- Analyze the impact of performance-related pay on employee motivation and organizational performance.
- Examine the uses of various benefits and allowances in compensation packages and their implications.
- Identify the factors influencing international pay and expatriate rewards in the public sector.
- Learning the skills of marketing in the pension field and using pensions for the benefit of employees
- Comprehending the pension scheme regulation deeply
- Learning the future-proof sales
- Learning the art of policy formulation
- Discovering the skills of pension scheme governance
- Comprehending the pension scheme from the perspectives of a different jurisdiction
- Learning the marketing art in the competing pension field and other available investment options
- Updating the knowledge and learning the new market trends
- Learning the use of artificial intelligence and technology in the field of pension
- Acquiring diverse skills like critical thinking, decision-making skills etc
- Apprehension of the current governance and pension designs
- Discovering the techniques for improving the cash flow
- Learning about new tools, techniques and strategies for reducing the risks
