Sustainable Facilities Professional (SFP)

Code: LM28 From: 25 - 29 May 2025 City: Cairo (Egypt) Fees: 3400 Pound

Introduction

This course is designed for professionals seeking to enhance their knowledge and skills in sustainable facility management. The course focuses on the most modern and advanced practices in sustainable facilities management, providing participants with a comprehensive understanding of sustainability principles and strategies. Whether you are an experienced facility manager or new to the field, this course will equip you with the tools and techniques necessary to effectively manage sustainable facilities and contribute to environmental stewardship.

Objectives

- Gain an in-depth understanding of sustainability principles and their application in facility management.
- Learn advanced strategies for integrating sustainability into facility planning, design, and operations.
- Explore the latest technologies and innovations in sustainable facility management.
- Develop skills in energy efficiency, water conservation, waste management, and indoor environmental quality.
- Understand the economic benefits and business case for sustainable facility management.
- Learn how to measure and track sustainability performance in facilities.
- Acquire knowledge of green building certifications and standards.
- Enhance leadership and communication skills for promoting sustainability initiatives within organizations.
- Network and collaborate with other professionals in the field of sustainable facility management.
- Develop a comprehensive action plan for implementing sustainable practices in your own facility.
