# Advanced Good Distribution Practice (GDP) for the Pharmaceutical Industry

Code: HM28 From: 24 - 28 February 2025 City: Vienna (Austria) Fees: 4900 Pound

## Introduction

The Advanced Good Distribution Practice GDP course is designed to provide professionals in the pharmaceutical industry with the most up-to-date knowledge and skills in ensuring the quality and integrity of pharmaceutical products throughout the distribution process. This comprehensive 5-day course will cover the advanced concepts and best practices in GDP, equipping participants with the necessary tools to navigate the complex regulatory landscape and optimize their distribution operations.

## Objectives

- Gain a deep understanding of the principles and regulations governing Good Distribution Practice in the pharmaceutical industry.
- Explore the latest advancements and emerging trends in pharmaceutical distribution.
- Develop advanced skills in risk assessment, temperature control, and supply chain security.
- Learn effective strategies for managing transportation, storage, and distribution of pharmaceutical products.
- Enhance knowledge of quality management systems and quality assurance in GDP.
- Understand the role of technology and digitalization in optimizing pharmaceutical distribution processes.
- Foster awareness of global standards and guidelines for GDP compliance.
- Gain insights into the challenges and best practices for managing distribution in a global pharmaceutical supply chain.

## Course Outline

### Day 1

#### Introduction to Advanced GDP for the Pharmaceutical Industry

- Overview of Good Distribution Practice GDP and its significance in the pharmaceutical industry.
- Regulatory landscape and international guidelines for pharmaceutical distribution.
- Principles and requirements for GDP compliance.
- Trends and emerging challenges in pharmaceutical distribution.

### Day 2

#### Risk Management and Supply Chain Security

- Risk assessment methodologies in pharmaceutical distribution.
- Temperature control and cold chain management.

- Security measures and anti-counterfeiting strategies.
- Serialization and track-and-trace systems.

### Day 3

#### Transportation, Storage, and Distribution

- Best practices for transportation of pharmaceutical products.
- Warehouse management and storage conditions.
- Distribution network design and optimization.
- Reverse logistics and product recalls.

### Day 4

#### Quality Management Systems in GDP

- Quality assurance and quality control in pharmaceutical distribution.
- Auditing and supplier qualification.
- Deviation management and CAPA Corrective and Preventive Actions.
- Handling of expired and returned products.

### Day 5

#### Technology and Future Trends

- Digitalization and automation in pharmaceutical distribution.
- Data integrity and electronic record keeping.
- Blockchain applications in the pharmaceutical supply chain.
- Future trends and innovations in GDP.
