ISO/IEC 27001 Foundation

code: IT28 From: 1 - 5 December 2024 Venue: Dubai (UAE) - VOCO Dubai Fees: 4400 Pound

Introduction

The Advanced ISO/IEC 27001 Foundation course is a comprehensive program designed to provide participants with the latest knowledge and skills in implementing and managing information security management systems based on the ISO/IEC 27001 standard. This course builds upon the foundational concepts of ISO/IEC 27001 and delves into advanced topics, strategies, and best practices to ensure robust information security in today's rapidly evolving digital landscape. Through a combination of theoretical learning, practical exercises, and real-world case studies, participants will gain the necessary expertise to establish and maintain effective information security frameworks in their organizations.

Objectives

- Gain a comprehensive understanding of the ISO/IEC 27001 standard and its significance in safeguarding sensitive information.
- Explore advanced techniques for the implementation and management of information security management systems.
- Develop the skills required to conduct advanced risk assessments and establish risk treatment plans.
- Enhance incident response capabilities and develop incident management strategies to mitigate cybersecurity threats.
- Stay updated with the latest trends, emerging technologies, and regulatory requirements in information security management.
- Understand the principles of business continuity management and its integration with information security.
- Acquire knowledge of advanced security controls and their application in various organizational contexts.
- Develop skills in measuring and evaluating the effectiveness of information security controls and processes.

Course Outline

Day 1

Introduction to ISO/IEC 27001 Foundation

- Overview of information security management systems ISMS and their importance.
- Understanding the ISO/IEC 27001 standard and its framework.
- Roles and responsibilities in implementing and maintaining an ISMS.

Day 2

Advanced Risk Assessment and Management

- Advanced risk assessment methodologies and tools.
- Developing risk treatment plans and controls.
- Continuous monitoring and improvement of the ISMS.

Day 3

Incident Response and Management

- Advanced incident response strategies and techniques.
- Establishing incident management frameworks.
- Incident reporting, investigation, and lessons learned.

Day 4

Emerging Trends and Technologies in Information Security

- Exploring emerging technologies and their impact on information security.
- Adapting to changing regulatory requirements and compliance frameworks.
- Addressing challenges in cloud security, mobile security, and IoT security.

Day 5

Audit and Compliance in ISO/IEC 27001

- Conducting internal and external audits of the ISMS.
- Compliance management and alignment with legal and regulatory obligations.
- Best practices for maintaining ISO/IEC 27001 certification.
