HealthCare Management & Administration (HMA)

Code: HM28 From: 13 - 17 October 2025 City: Geneva Fees: 5400 Pound

Introduction

The role of Healthcare leaders is to create and sustain an organizational environment that optimizes the effectiveness and safety of patient care. This environment should be centered on patient care, focusing on ensuring the highest quality of care and service. A leader's role is not limited to providing the best physical environment but should extend to fostering an organizational culture that supports healthcare team members, especially in the often-stressful environment of direct patient care. The COVID-19 pandemic has underscored the need for resilience and agility across individuals, societies, and healthcare organizations worldwide. Health administration and management are the keys to navigating these challenges.

Important Note:

Blackbird Training Centre offers a site visit to a public/private hospital in Istanbul for group registration. You can check our YouTube channel to see videos of our hospital visits.

Course Objectives

By the end of this course, participants will:

- Enhance their skills to manage and administer their hospitals or medical departments effectively.
- Prepare healthcare leaders to execute related programs and oversee improvement projects.
- Gain advanced skills for organizational success, leadership, effectiveness, and efficiency techniques.
- Improve their ability to manage behavioral healthcare as a manager.
- Receive training on developing and implementing strategic planning.
- Maximize productive collaboration and minimize less productive behaviors.
- Understand roles and responsibilities related to medication reminders, medication assistance, and medication administration.
- Discuss the current healthcare delivery system as it relates to economics, access, and population health.
- Explore risk management in healthcare and the role of healthcare administrators.
