## Cyber Security Risk Assessment & Management

Code: IT28 From: 24 - 28 March 2025 City: Munich (Germany) Fees: 4700 Pound

#### Introduction

This Cyber Security Risk Assessment and Management course will teach you how how to conduct a security risk assessment to protect your organisation. You will learn about the laws and regulations that impose strict cyber security requirements on all organisations, and gain the skills to develop a compliance assessment plan and employ a standards-based risk management process while maintaining a satisfactory security posture. Attendees should have a basic knowledge of business processes and technology concepts. No specialised technical knowledge is assumed

### **Course Objectives:**

- Implement standards-based, proven methodologies for assessing and managing the risks to your organization's information infrastructure
- Select and implement security controls that ensure compliance with applicable laws, regulations, policies, and directives
- Extend security protection to Industrial Control Systems ICS and the cloud

## Risk Assessment and Management Course Outline:

#### Day 1

### Introduction to Risk Assessment and Management

- Ensuring compliance with applicable regulatory drivers
- · Protecting the organisation from unacceptable losses
- · Describing the Risk Management Framework RMF
- Applying NIST/ISO risk management processes

#### Characterising System Security Requirements

#### Defining the system

- Outlining the system security boundary
- Pinpointing system interconnections
- Incorporating the unique characteristics of Industrial Control Systems ICS and cloud-based systems

Identifying security risk components

Head Office: +44 7480 775 526 | 0 7401 177 335 Email: training@blackbird-training.com Website: www.blackbird-training.com

- Estimating the impact of compromises on confidentiality, integrity and availability
- Adopting the appropriate model for categorising system risk

#### Setting the stage for successful risk management

- Documenting critical risk assessment and management decisions in the System Security Plan SSP
- Appointing qualified individuals to risk governance roles

#### Day 2

#### Selecting Appropriate Security Controls

#### Assigning a security control baseline

- Investigating security control families
- · Determining the baseline from system security risk

#### Tailoring the baseline to fit the system

- Examining the structure of security controls, enhancements and parameters
- Binding control overlays to the selected baseline
- · Gauging the need for enhanced assurance
- Distinguishing system-specific, compensating and non-applicable controls

#### Day 3

#### Reducing Risk Through Effective Control Implementation

#### Specifying the implementation approach

- · Maximising security effectiveness by "building in" security
- Reducing residual risk in legacy systems via "bolt-on" security elements

#### Developing an assessment plan

- Prioritising depth of control assessment
- Optimising validation through sequencing and consolidation
- Verifying compliance through tests, interviews and examinations

#### Formulating an authorisation recommendation

- Evaluating overall system security risk
- Mitigating residual risks
- Publishing the Plan of Action and Milestones POA&M, the risk assessment and recommendation

#### Day 4

**Authorising System Operation** 

Aligning authority and responsibility

Head Office: +44 7480 775 526 | 0 7401 177 335

- · Quantifying organisational risk tolerance
- Elevating authorisation decisions in high-risk scenarios

#### Forming a risk-based decision

- · Appraising system operational impact
- · Weighing residual risk against operational utility
- Issuing Authority to Operate ATO

#### Day 5

### Maintaining Continued Compliance

#### Justifying continuous reauthorisation

- Measuring impact of changes on system security posture
- Executing effective configuration management
- Performing periodic control reassessment

#### Preserving an acceptable security posture

- Delivering initial and routine follow-up security awareness training
- Collecting on-going security metrics
- Implementing vulnerability management, incident response and business continuity processes
