Professional Oil and Gas Project Management

Code: OG28 From: 9 - 13 December 2024 City: Boston (USA) Fees: 5700 Pound

Introduction

Anyone working within the Oil & Gas industry knows that it is a complex project environment that throws up its own particular challenges. This detailed and integrated course will assist anyone in the industry to make better decisions on projects, whether they are responsible for project selection, management, or leading aspects of projects through any point of the project life cycle.

This interactive course provides participants with the advanced skills required to execute business strategies effectively, from decision-making models for commercial departments, through to FEED and into planning and delivery. Using industry best practice examples merged into practical instruction, with tried and tested processes and tools, this 10-days course is designed as a road map to provide the skills for planning, organising, execution and closing out of a project

Course Objectives of Professional Oil and Gas Project Management

- Identify with and manage stakeholders and communication needs in the Oil & Gas industry
- Maintain continuous project performance and delivery control
- Accurately estimate and allocate project costs and resources
- Compress or accelerate the schedule when required by adverse circumstances
- Develop a project close-out plan in line with expected success criteria

Professional Oil and Gas Project Management Course Outlines
