# Advanced Oil and Gas Supply Chain Management

Code: OG28 From: 30 March - 3 April 2025 City: Washington (USA) Fees: 5700 Pound

## Introduction

The Supply Chain is the active management of supply chain activities to maximize customer value and achieve a sustainable competitive advantage. Supply chain activities cover everything from product development, sourcing, production, and logistics, as well as the information systems needed to coordinate these activities. Organisations involved in running supply chains have to develop and run supply chains in the most effective and efficient ways possible.

The organizations that make up the supply chain are "linked" together through physical flows and information flows. There are the physical flows that involve the transformation, movement, and storage of goods and materials. They are the most visible piece of the supply chain; however, just as important are information flows. These allow the various supply chain partners to coordinate their long-term plans, and to control the day-to-day flow of goods and materials up and down the supply chain.

This Supply Chain Operations in the Oil & Gas Industry training course will explore key concepts and solutions that can be employed to optimize the balance between supply chain responsiveness and the costs required to deliver desired business results.

## Course Objectives of Advanced Oil and Gas Supply Chain Management

- Understand how to maximize the effectiveness of your organisation's supply chain operations
- Appreciate the need to work with suppliers to gain tangible business results
- Use an inventory strategy that increases the cash flow
- Identify supply chain risk by using analytical tools
- Apply changes in the organisation in order to make cost and service improvements

## Advanced Oil and Gas Supply Chain Management Course Outlines

### Day 1

#### Understanding the Supply Chain Operations

- Appreciating the Supply Chain Upstream and Downstream
- Understanding Internal and External Supply Chains
- Processes in the Supply Chain
- Working with Suppliers and Customers
- Identifying Gaps in Performance

### Day 2

UK Training  
**PARTNER**

### How to Manage Inventory Effectively

- Types of Inventory
- Maximizing Inventory Turns Through Working with Customers and Suppliers
- Improving the Cash Cycle Time
- Making Savings through Inventory Management
- Improving Supplier Relationship Management

### Day 3

#### Reducing Risks in the Supply Chain

- Identifying Internal Supply Chain Risks
- Understanding Risk Management Principles
- Applying SWOT and PESTLEE Models
- Risk Management Planning through Contingencies
- Prioritization of Risks in the Supply Chain

### Day 4

#### Managing Outsourcing in the Organisation

- What is outsourcing?
- How to Manage the Outsourced Contract
- Making Sure that You are not Paying too much for an Outsourced Contract
- Understanding How to Measure the Performance of Contracts
- Appreciating Cost / Service Trade-offs

### Day 5

#### Improving the Oil & Gas Supply Chain Operation

- Measuring the Performance of the Supply Chain
- Improving the Supply Chain Operation's Performance
- Using Suppliers and Customers to Improve the Supply Chain Operation
- Ensuring the Organisation Develops a Continuous Improvement Strategy
- Minimizing Risk by Re-engineering the Supply Chain Operation
