Code: FA28 From: 19 - 23 January 2025 City: Washington (USA) Fees: 4700 Pound

Introduction

Planning and budgeting are must-have skills for all professionals regardless of their function or managerial level. This course covers the concept of budgeting as a planning tool, a financial device, and a control mechanism. In addition, it provides the necessary application tools required for making long-term and short-term planning decisions.

It is essential to understand how costs behave so that realistic plans can be produced, and appropriate financial and non-financial resources can be made available to the business. Management Control builds on the budgets to understand variances and take corrective actions. This course will allow you to master the traditional tools of budgeting and control as well as new dynamic approaches, which reflect and respond to the current complex business environment.
