Advanced Financial Statements Analysis & Forecasting

Code: FA28 From: 17 - 21 November 2025 City: Berlin (Germany) Fees: 4200 Pound

Introduction

In today's world, finance professionals are challenged by providing management with a detailed analysis of the impact of the organization's financial decisions. Therefore, finance professionals need to be skilled at reading through the numbers on the financial statements, analyzing the figures, interpreting the various ratios, and presenting this analysis in a dynamic manner. This course takes you from the first step of understanding the relationships between the different elements of financial statements, through the process of calculating and analyzing the financial ratios, to the last step of presenting recommendations. While applying Excel tools and techniques, various real-life examples of published financial statements will be used throughout the course.

Course Objectives

- Apply the framework of financial statements analysis.
- Use ratio and financial analysis.
- Interpret company financials and sector position.
- Appraise the process of company evaluation and analysis.
- Analyze real-life financial statements from companies traded in the world.
- Prepare financial analysis and template models.

Course Outlines
