Information Security & Cyber Security

Code: IT28 From: 11 - 15 November 2024 City: Düsseldorf (Germany) Fees: 4900 Pound

Introduction

The course provides delegates with a high-level understanding of how to protect an organization from cyber-attacks and provides an overview of the threats facing organizations and the basics of Information Security techniques and controls to help protect against those threats.

You will gain a global perspective of the challenges of designing a secure system, touching on all the cyber roles needed to provide a cohesive security solution. Through the lecture, you will learn about current threat trends across the Internet and their impact on organizational security. You will review standard cybersecurity terminology and compliance requirements, examine sample exploits, and gain hands-on experience mitigating controls.

Course Objectives

- Understand the cyber threats and vulnerabilities in organizations.
- Understand the basic Information Security techniques and controls to protect organizations from cyber attacks.
- Understand the basics of an Information Security Management System ISMS.
- Explore different data protection principles.
- Explore social engineering threats, methods, and techniques.
- Examine software vulnerabilities and security solutions for reducing the risk of exploitation.
