## Business Data Analytics

Code: IT28 From: 11 - 15 November 2024 City: Cape Town (South Africa) Fees: 4000 Pound

### Introduction

In this day and age, it is no surprise for the corporate staff to be overwhelmed by the abundance of unstructured data. ERPs and databases have evolved to a point where they can house amazingly large amounts of data. The question now is, what do you do with this data to add value? This program will introduce Business Intelligence BI, hands-on, to allow you to clean, normalize, and interpret large volumes of data. You will be able to establish historical relationships, analyse the current situation and predict future strategies. The application of BI is borderless, covering operational, tactical, and strategic business decisions. It spans all departments and cascades down to all users who perform data cleansing, reporting, analysis, modeling, integration, and automation. In this course, we use MS Excel exclusively as an ultimate and readily available BI tool allowing you to develop an exclusive level of expertise and add immediate value to your job and company.

### Course Objectives
