Consolidated Financial Statements

Code: FA28 From: 24 - 28 February 2025 City: Seattle, Washington (USA) Fees: 5700 Pound

Introduction

Consolidated financial statements are an integral part of the accounting process for group companies. This information provides a holistic view of the entire business activity, which is often lost when examining only the financial figures of the parent company or a single subsidiary. The use of consolidated financial statements is essential today for any organization operating within a group, regardless of the business stage. By choosing to utilize consolidation software, it is possible to reduce the complexity of preparing these statements and enhance their usability. In consolidated financial statements, the financial data of the parent company and its subsidiaries are merged as if they were one economic entity. Preparing consolidated financial statements involves complex and intricate procedures. However, the training course on consolidating financial data and investment accounting will guide you step by step on how to prepare these statements effectively.

Course Objectives

- Understand the process of consolidating financial statements.
- Identify business groups and related transactions.
- Apply the method of acquiring business groups.
- Calculate minority interest and non-controlling interests.
- Identify different types of financial instruments and their accounting methods.
- Calculate transactions based on fair value, equity method, and extinguishment of cost.
- Understand the differences and similarities between International Financial Reporting Standards IFRS and Generally Accepted Accounting Principles GAAP.

Course Outlines
