## Advanced Excel Skills for Business and Financial Analysis

Code: FA28 From: 2 - 6 December 2024 City: Paris (France) Fees: 4400 Pound

### Introduction

The "Advanced Excel Skills for Business and Financial Analysis" course is crafted to empower participants with essential Excel skills for data manipulation, complex financial calculations, dynamic modeling, and insightful reporting, tailored to drive strategic decision-making in business. Through practical exercises and real-world applications, participants will learn advanced techniques for data analysis, visualization, and creating dynamic models that add substantial value to their organizations.

### Course Objectives

- Master advanced Excel functions and formulas for business analysis.
- Develop proficiency in financial modeling and forecasting techniques.
- Gain hands-on experience in building dynamic dashboards and reports.
- Learn data analysis and visualization techniques to uncover insights.
- Understand best practices for structuring and organizing Excel workbooks efficiently.

### Course Outlines

#### Day 1: Advanced Excel Functions and Formulas

- Advanced nested functions and array formulas
- Lookup and reference functions VLOOKUP, HLOOKUP, INDEX, MATCH
- Logical functions IF, AND, OR
- Text functions for data manipulation
- Date and time functions
- Statistical functions for analysis

#### Day 2: Financial Modeling and Analysis

- Building financial models for forecasting and budgeting
- Sensitivity analysis and scenario modeling
- Discounted cash flow DCF analysis
- Valuation techniques NPV, IRR
- Ratio analysis for evaluating financial performance

#### Day 3: Data Analysis and Visualization

- PivotTables and PivotCharts for data summarization and analysis
- Data validation and conditional formatting
- Advanced charting techniques combo charts, sparklines

A graphic of a chessboard with several chess pieces (a king, a pawn, and a knight) on it, set against a background of concentric circles. The text 'UK Training PARTNER' is overlaid on the right side of the board.

- Principles of interactive dashboard design
- Visualizing trends and patterns in data

#### Day 4: Automation and Efficiency

- Automating tasks with Macros and VBA programming
- Creating custom functions and user-defined formulas
- Techniques for data importing and exporting
- Optimizing workbooks for performance
- Collaboration and sharing features in Excel

#### Day 5: Real-World Case Studies and Projects

- Analyzing financial statements and business performance
- Forecasting sales and revenue based on historical data
- Building dynamic financial models for scenario analysis
- Creating interactive dashboards for executive reporting
- Presenting findings and recommendations effectively

#### Conclusion

Upon completing this course, participants will achieve mastery in advanced Excel skills for business and financial analysis, enabling them to analyze financial data, design dynamic dashboards, and build financial models to meet modern organizational demands. They will also learn to streamline workflows through automation and enhance Excel workbook efficiency for impactful, strategic reporting that supports decision-making at all levels.
