## Internal Audit on Virtual Assets in the Public Sector

Code: QM28 From: 8 - 12 December 2025 City: Bangkok (Thailand) Fees: 4700 Pound

### Introduction

With the rapid digital transformation in government institutions, virtual assets have become a key component in supporting government operations and enhancing operational efficiency. These virtual assets include digital data, software, cloud-based assets, intellectual property rights, and large-scale databases. Given their importance, internal auditing of these assets is essential to ensure their security, efficiency, and compliance with established policies and regulations.

This comprehensive training course is designed to equip mid-level professionals in the public sector with the knowledge and practical skills necessary to effectively apply internal auditing on virtual assets, focusing on digital risks, security controls, and best international practices. By exploring the virtual assets definition, their meaning, and the internal audit process, participants will gain the tools needed to safeguard valuable digital resources and ensure compliance with relevant policies.

### Course Objectives

By the end of this course, participants will be able to:

- Strengthen their understanding of virtual assets and their importance in government institutions.
- Apply professional internal audit standards to virtual assets and other asset management processes.
- Analyze and assess digital risks and challenges related to managing virtual assets.
- Develop advanced control strategies to protect virtual assets from cyber threats.
- Conduct internal audit procedures that ensure compliance with government and international standards.
- Enhance cybersecurity measures and minimize risks associated with virtual assets in the public sector.
