Cost Accounting for Decision Making

Code: FA28 From: 1 - 5 December 2025 City: Bangkok (Thailand) Fees: 4700 Pound

Introduction

In today sold dynamic and competitive business landscape, cost accounting plays a critical role in supporting strategic decision-making and improving financial efficiency. This course is designed to provide participants with a solid understanding of what cost accounting is, how it differs from financial accounting, and how it can be applied to control costs, increase profitability, and drive sustainable growth.

Combining foundational theory with practical case studies, this cost accounting training equips professionals with the knowledge and tools to analyze, classify, and manage costs effectively. Whether you're looking to understand cost accounting basics or advance your knowledge of modern cost accounting methods, this course delivers clear, actionable skills to enhance your financial impact.

Course Objectives

By the end of this cost accounting course, participants will be able to:

- Understand the fundamentals of cost accounting and its role in strategic business management.
- Define and classify direct and indirect costs, and assess their impact on organizational performance.
- Apply key cost accounting methods such as Activity-Based Costing ABC, Job Order Costing, and Process Cost Accounting.
- Utilize cost and accounting data to build cost-reduction strategies and improve profitability.
- Prepare and interpret financial cost reports to support planning and decision-making.
- Explore the relevance of project cost accounting, product cost accounting, and service cost accounting in real-world business contexts.

Course Outlines
