Integrated Risk Management Professional

Ref: 3255156_189614 **Date:** 26 – 30 July 2027 **Location:** Kuala Lumpur (Malaysia) **Fees:** 4200 GBP

Introduction

In today's uncertain business environment, organizations must adopt a proactive and structured approach to managing risks across all levels. The Integrated Risk Management IRM framework provides a comprehensive way to identify, assess, and mitigate risks while aligning with corporate governance and decision-making.

This course equips participants with the knowledge, tools, and hands-on techniques needed to manage strategic, operational, financial, compliance, and reputational risks. It emphasizes international standards such as ISO 31000 and COSO ERM, while addressing modern challenges like cybersecurity, AI, data risks, and crisis management. Participants will learn how to design and implement enterprise-wide risk management structures that build resilience and foster a risk-aware culture.

Course Objectives

By the end of this program, participants will be able to:

- Understand the core principles and frameworks of integrated risk management IRM.
- Apply risk assessment tools and techniques across multiple business domains.
- Develop and implement enterprise-wide risk management policies.
- Align risk management with organizational strategy, governance, and performance.
- Use risk registers, heat maps, and KRIs for monitoring and reporting.
- Strengthen organizational resilience through business continuity and crisis management.
- Foster a sustainable risk-aware culture across all levels of the organization.
