Spectrum matters for 5G/6G & Evolution of Cellular Network Development

Code: GC28 From: 29 June - 3 July 2026 City: Lyon (France) Fees: 4900 Pound

Introduction

As mobile networks evolve from 4G to 5G and the upcoming 6G, spectrum has become one of the most critical strategic resources in wireless communications. Spectrum is not just a technical requirement—it underpins service quality, network capacity, coverage expansion, and the ability to meet growing demands for ultra-high speeds and low latency.

The training program Spectrum Matters for 5G/6G & Evolution of Cellular Network Development is designed to provide participants with a deep understanding of spectrum management, the evolution of cellular technologies, and how spectrum utilization shapes the future of digital transformation, IoT, and AI-driven applications. It is tailored for executives, team leaders, and professionals across diverse sectors including telecommunications, oil and gas, finance, government, and project management.

The practical value of this course lies in connecting institutional strategies with technical innovations while preparing organizations to embrace the transformative changes of next-generation networks.

Course Objectives

By the end of this course, participants will be able to:

- Understand the strategic importance of spectrum in 5G/6G.
- Trace the evolution of cellular networks from 1G to 6G.
- Analyze spectrum requirements for different deployment environments.
- Recognize regulatory and policy challenges related to spectrum.
- Apply spectrum planning methods to improve efficiency and resilience.
- Evaluate the impact of spectrum on QoS and user experience.
- Review case studies of successful and failed spectrum management.
- Develop advanced strategies for future-ready cellular networks.

Course Outlines

Day 1: Spectrum Basics and Cellular Evolution

- Introduction to spectrum and its role in mobile communications.
- Evolution of networks from 1G to 4 G.
- Key technical shifts leading to 5G and 6G.
- Fundamentals of spectrum allocation.
- Relationship between spectrum and network capacity.
- Case studies from global markets.

Day 2: Spectrum in 5G Networks

- Frequency bands used in 5G deployments.
- Characteristics of millimeter-wave spectrum.
- Managing spectrum for IoT and AR/VR applications.
- Spectrum's role in reducing latency.
- Expansion strategies for 5G coverage.
- Performance data analysis in live 5G networks.

Day 3: Towards the Sixth Generation 6G

- Early concepts and principles of 6G.
- Ultra-high frequency bands above 100 GHz.
- Spectrum requirements for futuristic applications holograms, smart cities.
- Infrastructure and deployment challenges.
- Integration of spectrum and artificial intelligence.
- Global research perspectives and trends.

Day 4: Regulatory and Policy Challenges

- Regional and international spectrum policies.
- Role of regulators in spectrum management.
- Interference management and coordination.
- Cybersecurity considerations linked to the spectrum.
- Public-private partnership models in spectrum allocation.
- Local and regional case discussions.

Day 5: Practical Applications and Institutional Strategies

- Embedding spectrum strategies into organizational planning.
- Practical tools for spectrum planning and forecasting.
- Scenario-based spectrum allocation exercises.
- Long-term roadmaps for network evolution.
- Hands-on exercises in network spectrum planning.
- Final recommendations and case study reviews.

Why Attend this Course? Wins & Losses!

- Comprehensive knowledge of the spectrum's role in 5G/6G.
- Clear understanding of cellular network evolution.
- Strengthened ability to make strategic decisions.
- Exposure to global best practices.
- Practical tools to support organizational planning.
- Advanced competencies in spectrum management.
- Support for digital transformation initiatives.
- Specialized expertise in high demand across industries.

Conclusion

Spectrum is the cornerstone of successful 5G and 6G deployments and the continued evolution of cellular networks. This course empowers participants to combine strategic insights with practical technical knowledge,

PARTNER

preparing them to address the challenges of next-generation connectivity.

By aligning spectrum strategies with organizational goals, participants will be equipped to ensure long-term competitiveness, service quality, and digital resilience in an era defined by hyper-connectivity and intelligent communication systems.
