Taxation of Intangibles in Developing Countries

Code: FA32 From: 24 - 28 August 2026 City: Bangkok (Thailand) Fees: 5400 Pound

Introduction

In the rapidly evolving global economy, intangible assets such as software, trademarks, patents, and intellectual property are becoming increasingly crucial to business value. However, taxation of intangibles poses unique challenges, particularly for developing countries. Understanding the taxation meaning and learning the taxation audit processes are essential for ensuring compliance with local and international tax regulations.

This course provides participants with in-depth knowledge of taxation of intangible property in developing countries. Participants will explore the taxation definition from both local and global perspectives, understanding how these intangible properties are valued, taxed, and managed. Through case studies and practical applications, this program equips learners with strategies to enhance tax compliance, mitigate risks, and apply best practices in different economic and regulatory environments.

Course Objectives

By the end of this course, participants will be able to:

- Understand the definition of intangible assets and their significance in business valuation.
- Analyze the taxation of intangibles in developing countries and identify unique challenges.
- Explore the developing countries definition and how economic status impacts tax strategies.
- Apply effective taxation audit techniques to ensure compliance with regulatory frameworks.
- Implement best practices for enhancing tax compliance and minimizing risks associated with intangible property taxation.

Course Outlines
