Principles of Bookkeeping and Financial Recording

Ref: 3255322_192871 **Date:** 18 – 22 April 2027 **Location:** Manama (Bahrain) **Fees:** 4200 GBP

Introduction

The Principles of Bookkeeping and Financial Recording course is designed to provide participants with essential knowledge and practical skills in accounting fundamentals, bookkeeping processes, and journal entry preparation.

It focuses on how financial transactions are recorded, classified, and summarized within an organization's accounting system, following international best practices.

This program emphasizes real-world accounting cycles, the double-entry principle, ledger management, and the preparation of trial balances and financial statements.

Through practical exercises and real-life examples, participants will gain the competence to handle bookkeeping and financial reporting with confidence and precision.

Course Objectives

By the end of this course, participants will be able to:

- Understand the basic concepts and principles of accounting and bookkeeping.
- Record and classify financial transactions accurately.
- Prepare and post journal entries using the double-entry accounting system.
- Manage general and subsidiary ledgers effectively.
- Reconcile accounts and prepare trial balances.
- Understand the relationship between bookkeeping and financial statement preparation.
- Apply bookkeeping and journalizing using computerized accounting systems.
