Sustainable Gold Reserve Management and ESG Integration

Code: ES32 From: 8 - 12 August 2027 City: Amman (Jordan) Fees: 4900 Pound

Introduction

The transition toward sustainable finance has reshaped how institutions approach reserve asset management. In this context, Sustainable Gold Reserve Management and ESG Integration has become a strategic competency for central banks, sovereign wealth funds, treasury teams, and financial institutions.

This advanced 5-day program explores the intersection between ESG principles Environmental, Social, and Governance and the modern management of gold reserves. Participants will learn how sustainability considerations impact reserve decisions, how ESG criteria are integrated into gold acquisition and storage policies, and how global best practices guide risk assessment, transparency, reporting, and long-term wealth preservation.

The course blends strategic insights with practical tools, equipping participants to apply ESG frameworks within precious metals portfolios while maintaining compliance with international standards and the evolving global regulatory landscape.
