CompTIA Project+ (PK0-005) – Professional Project Management Training

Ref: 3255485_197207 **Date:** 12 – 16 April 2027 **Location:** Kuala Lumpur (Malaysia) **Fees:** 4900 GBP

Introduction

In today's dynamic, technology-driven business environment, organizations increasingly depend on structured project management practices to deliver successful IT and business initiatives.

As projects grow in complexity, become more time-sensitive, and operate under tighter resource constraints, professionals need a practical and adaptable foundation in project management. CompTIA Project+ offers a globally recognized, vendor-neutral framework that equips professionals with essential project management skills applicable across industries.

This course is fully aligned with the latest CompTIA Project+ PK0-005 exam objectives and reflects modern project management practices, including Agile and hybrid approaches, risk and change management, stakeholder engagement, and performance measurement.

The program bridges the gap between technical execution and managerial oversight, enabling participants to confidently plan, execute, monitor, and close projects while delivering measurable business value.

Course Objectives

By the end of this course, participants will be able to:

- Understand core project management concepts and terminology
- Manage the complete project lifecycle from initiation to closure
- Develop project plans, schedules, and budgets
- Apply risk, issue, and change management techniques
- Communicate effectively with stakeholders and project teams
- Monitor project performance using KPIs and metrics
- Apply Agile and hybrid concepts within traditional project environments
- Prepare confidently for the CompTIA Project+ PK0-005 certification exam
