Sustainable Finance & ESG

Ref: 3255217_199658 **Date:** 5 – 9 April 2027 **Location:** Paris (France) **Fees:** 5200 GBP

Introduction

Sustainable Finance & ESG Environmental, Social, and Governance has become one of the most transformative forces reshaping global financial markets. With governments, corporations, and investors demanding greater accountability, the adoption of ESG principles is no longer optional—it is a strategic necessity. This program addresses the pressing need for executives and leaders in the Middle East and North Africa to integrate sustainability into finance, risk management, and long-term corporate strategy.

The course is designed for decision-makers across sectors, including oil and gas, banking and finance, telecommunications, government, human resources, and project management. Participants gain practical frameworks and strategies that not only meet compliance requirements but also position their organizations for long-term success.

Course Objectives

By the end of this course, participants will be able to:

- Understand the foundations of sustainable finance and ESG principles.
- Apply global ESG standards to organizational financial strategies.
- Analyze the role of sustainability in risk assessment and investment decisions.
- Implement ESG reporting frameworks aligned with international benchmarks.
- Drive corporate social responsibility initiatives linked to financial growth.
- Evaluate sustainable investment portfolios and green financing tools.
- Lead cultural transformation towards sustainable organizational practices.
- Integrate ESG into long-term strategic and financial planning.
