Organizational Effectiveness: Strategic Development, Organization Design & Performance Management

Ref: 3255907_212694 **Date:** 2 – 6 August 2027 **Location:** Berlin (Germany) **Fees:** 5200 GBP

Introduction

In today's rapidly evolving business environment, organizations must continuously adapt to changing market conditions, technological advancements, and workforce expectations. Sustainable success depends not only on well-defined strategies but also on an organizational structure capable of supporting business objectives, enabling high performance, and driving continuous improvement. Organizations that successfully align strategic development, organization design, and performance management are better positioned to improve productivity, strengthen employee engagement, and achieve long-term organizational excellence.

The Organizational Effectiveness: Strategic Development, Organization Design & Performance Management course provides a comprehensive understanding of the principles, frameworks, and methodologies used to improve organizational performance. Participants will explore how strategic planning, organizational development, organization design, workforce planning, governance, and performance management systems work together to create agile, efficient, and high-performing organizations.

Throughout the course, participants will examine the relationship between organizational strategy, operating models, organizational structures, role design, capability development, and performance measurement. The course also addresses business transformation, organizational change, leadership alignment, and the integration of performance management practices that support strategic objectives. By combining internationally recognized best practices with practical organizational frameworks, this course enables participants to understand how organizations improve effectiveness, optimize resources, and strengthen overall business performance across public and private sector organizations.

Course Objectives

By the end of this course, participants will be able to:

- Understand the principles of organizational effectiveness and organizational development.
- Explain the relationship between strategic development and organizational performance.
- Analyze organizational structures and identify opportunities for improvement.
- Apply organization design principles to support business objectives.
- Understand operating models and governance frameworks.
- Develop organizational structures that support strategic priorities.
- Evaluate workforce planning approaches and organizational capabilities.
- Design effective roles, responsibilities, and reporting relationships.
- Understand performance management systems and performance measurement frameworks.
- Develop meaningful performance indicators aligned with strategic objectives.
- Analyze organizational performance using qualitative and quantitative measures.
- Support organizational transformation and change initiatives.
- Improve organizational agility and operational effectiveness.
- Strengthen alignment between strategy, people, processes, and organizational structure.
- Contribute to sustainable organizational growth and continuous performance improvement.
