Executive Decision-Making for Leadership in Complex Organizations

Ref: 3254677_317221 **Date:** 18 – 22 January 2027 **Location:** Singapore (Singapore) **Fees:** 5400 GBP

Introduction

This course is designed for executives and leaders who want to master the art of strategic decision-making in complex, fast-paced organizational environments. It provides advanced skills to handle high-pressure situations, navigate uncertainty, and make informed decisions that align with organizational goals. You will explore techniques for analyzing challenges, assessing risks, and fostering collaboration. By the end of the course, you will have the confidence to make effective, data-driven decisions that impact your organization's success and sustainability.

Course Objectives

- Develop Strategic Thinking: Enhance your ability to think critically and strategically when faced with organizational challenges.
- Improve Decision-Making Skills: Master decision-making frameworks and processes, even under pressure.
- Navigate Complexity: Gain the tools to make decisions in fast-changing, complex environments.
- Manage Risk and Uncertainty: Learn how to assess and mitigate risks while making high-stakes decisions.
- Balance Short-Term and Long-Term Goals: Align decisions with both immediate needs and long-term objectives.
- Lead with Confidence: Build the confidence to make decisive decisions and manage their outcomes.
- Evaluate Organizational Impact: Understand the broader organizational effects of your decisions on stakeholders.
- Foster Collaboration: Develop skills to make decisions collaboratively within cross-functional teams.
- Leverage Data for Decision-Making: Use data and analytics to inform decisions and improve decision-making outcomes.
- Cultivate Ethical Leadership: Ensure decisions are ethically sound and align with organizational values.

Course Outlines

Day 1: Foundations of Executive Decision-Making

- Understand key principles of strategic decision-making.
- Differentiate between strategic, tactical, and operational decisions.
- Examine decision-making models for complex organizations.
