Digital Skills in the Workplace: A Key Driver for Organizational Success

Ref: 3254869_324080 **Date:** 15 – 19 February 2027 **Location:** Baku (Azerbaijan) **Fees:** 5200 GBP

Introduction

In today's digital and technical skills era, digital skills in the workplace are no longer optional—they're essential for staying competitive and relevant. But what are digital skills exactly? These skills span from digital marketing skills and digital communication skills to using advanced digital tools that drive innovation and productivity.

For executives, team leaders, and specialists in the Middle East and North Africa MENA region, mastering these skills is key to thriving in dynamic markets. This digital skills course aims to highlight why digital skills are important, reveal best practices for acquiring and implementing them, and provide actionable strategies for professionals at every level.

Whether you're a team leader seeking to build a digital culture or a professional aiming to boost your digital literacy and career prospects, this course offers practical, real-world knowledge to help you build a digital skills foundation and lead your organization into the future.

Course Objectives

By the end of this digital skills training, participants will:

- Understand the digital skills definition and importance of digital skills in the workplace.
- Identify gaps between current and future digital skill requirements.
- Apply essential digital skills and tools to boost efficiency and productivity.
- Build a digital culture that supports innovation and adaptability.
- Develop digital leadership capabilities to champion digital literacy and adoption.
- Leverage advanced tools like AI and data analytics in daily tasks.
- Create practical upskilling plans to bridge digital literacy gaps.
- Evaluate the impact of digital skills on team and organizational performance.

Course Outlines

Day 1: Introduction to Digital Skills
