Financial Insights for Non-Financial Professionals

Ref: 3254939_326538 **Date:** 6 – 10 September 2027 **Location:** Los Angeles (USA) **Fees:** 5900 GBP

Introduction

In today's dynamic and data-driven business world, professionals across departments are increasingly expected to understand the financial implications of their decisions. Financial knowledge is no longer limited to accounting teams—it's a strategic asset for every leader, project manager, and departmental head.

This course is designed for executives, team leaders, project coordinators, and professionals from both public and private sectors in the Middle East and North Africa. It specifically targets individuals working in oil and gas, telecommunications, banking, human resources, marketing, project management, and government sectors.

Through practical, simplified frameworks, this program empowers non-financial professionals to interpret financial data, analyze budgets, engage confidently with finance teams, and drive decisions that align with institutional goals and fiscal sustainability.

Course Objectives

- Learn essential financial concepts and terminology in a clear, simple format.
- Understand and interpret the three main financial statements.
- Use financial ratios to assess institutional performance.
- Read and create operational budgets with accuracy.
- Communicate effectively with financial and auditing teams.
- Analyze cost structures and evaluate profitability.
- Differentiate between capital and operating expenses.
- Recognize the financial impact of day-to-day decisions.
- Build basic financial models to support planning.
- Promote a culture of financial awareness across your team or department.

Course Outlines
