Governance with Risk and Compliance (GRC)

Ref: 3255258_336529 **Date:** 12 – 16 September 2027 **Location:** Dubai (UAE) **Fees:** 4900 GBP

Introduction

In today's volatile regulatory and digital landscape, organizations face increasing pressure to demonstrate strong governance, robust risk management, and effective compliance with international standards. At the same time, excellence in Information Technology IT management has become a cornerstone for achieving strategic objectives, safeguarding data, and driving innovation.

This advanced 1-week training program is tailored for executives, compliance professionals, IT managers, and business leaders who seek to master Governance, Risk, and Compliance GRC principles while integrating them with IT management excellence. Participants will explore frameworks, tools, and methodologies to strengthen governance, manage enterprise and IT risks, ensure compliance, and enable sustainable digital transformation.

Through expert-led sessions, interactive workshops, and real-world case studies, participants will gain the skills to design and implement integrated GRC strategies that enhance organizational resilience and IT excellence.

Course Objectives

By the end of this program, participants will be able to:

- Understand the fundamentals of GRC and its impact on organizational performance.
- Apply global frameworks such as COBIT, ISO 31000, ISO 38500, and COSO to reinforce governance and risk management.
- Integrate GRC with IT excellence models to align technology strategy with business goals.
- Identify, assess, and mitigate enterprise and IT risks, including cybersecurity and regulatory challenges.
- Build compliance programs that align with international standards and local regulations.
- Lead organizational excellence through IT governance and digital transformation.
