Fraud and Corruption Prevention in Internal Audit

Ref: 3255313_337716 **Date:** 2 – 6 May 2027 **Location:** Tunis (Tunisia) **Fees:** 4200 GBP

Introduction

Fraud and Corruption Prevention in Internal Audit is a critical function in maintaining transparency, accountability, and integrity within organizations.

In an environment where financial and operational risks continue to evolve, internal auditors play a vital role in identifying, assessing, and preventing fraudulent and unethical activities.

This course provides participants with a comprehensive understanding of modern practices, analytical tools, and investigation techniques used to detect and prevent fraud and corruption.

Through real-world case studies and interactive exercises, participants will learn how to evaluate internal control systems, apply forensic auditing techniques, and develop effective governance frameworks that strengthen organizational resilience.

The program blends theoretical knowledge with hands-on application, enabling participants to implement robust anti-fraud measures and enhance their organization's defense mechanisms against corruption and misconduct.

Course Objectives

By the end of this course, participants will be able to:

- Understand the key principles of Fraud and Corruption Prevention in Internal Audit and their impact on corporate integrity.
- Identify different types and patterns of fraud and corruption within organizational operations.
- Conduct fraud risk assessments and design effective preventive controls.
- Apply forensic auditing and investigative techniques to detect irregularities.
- Utilize data analytics tools to uncover fraud indicators and suspicious transactions.
- Develop corporate governance and ethical compliance policies.
- Strengthen collaboration between internal audit, risk, and compliance functions.
- Prepare professional audit reports and present actionable recommendations to management.

Course Outlines

Day 1: Fundamentals of Fraud and Corruption
