Executive Leadership in ESG and Sustainable Strategy

Ref: 3255358_339383 **Date:** 28 December 2026 – 1 January 2027 **Location:** Düsseldorf (Germany) **Fees:** 5900 GBP

Introduction

Modern executive leadership is no longer defined solely by profit margins or operational efficiency. Today's leaders are expected to drive their organizations toward responsible growth that balances financial performance with environmental, social, and governance ESG commitments.

The Executive Leadership in ESG and Sustainable Strategy program equips leaders and decision-makers with the knowledge and tools needed to build sustainability-driven organizations capable of long-term value creation.

Designed specifically for executives, managers, and professionals across public and private sectors in the Middle East and North Africa, this program offers a practical framework for embedding ESG principles into strategic decision-making and daily operations.

Participants will learn how to turn sustainability objectives from symbolic commitments into measurable business advantages that enhance corporate reputation, stakeholder trust, and institutional resilience.

Course Objectives

- Understand the key principles and global frameworks of ESG and sustainable strategy.
- Analyze the role of executive leadership in shaping and executing sustainability agendas.
- Apply performance measurement tools across environmental, social, and governance dimensions.
- Integrate sustainability into business models, value chains, and corporate processes.
- Develop ESG-aligned performance indicators KPIs to track institutional progress.
- Examine real-world case studies from leading international and regional organizations.
- Strengthen data-driven decision-making and ethical leadership capabilities.
- Foster a culture of accountability, inclusion, and environmental responsibility.
