Artificial Intelligence for Lawyers: Strategy, Ethics, and Legal Practice

Ref: 3255569_345233 **Date:** 14 – 18 March 2027 **Location:** Online **Fees:** 2700 GBP

Introduction

The Artificial Intelligence for Lawyers: Strategy, Ethics, and Legal Practice program is designed to equip legal professionals with a clear, practical, and structured understanding of how artificial intelligence is transforming the delivery of legal services and legal decision-making.

This intensive one-week course focuses on the strategic, ethical, and operational implications of artificial intelligence in legal practice rather than technical development. Participants explore how AI is applied in legal research, contract management, compliance, litigation support, and legal operations, while addressing professional responsibility, regulatory frameworks, confidentiality, and risk management.

Through real-world case studies, guided discussions, and applied examples, the program enables participants to critically evaluate AI tools, adopt them responsibly, and integrate them into legal workflows without compromising legal judgment, ethical obligations, or professional standards.

Course Objectives

By the end of this course, participants will be able to:

- Understand core artificial intelligence concepts relevant to the legal profession.
- Identify strategic AI use cases across law firms and in-house legal departments.
- Evaluate AI tools for legal research, document review, and contract management.
- Assess ethical, regulatory, and professional risks associated with AI adoption.
- Apply AI in compliance with legal obligations, confidentiality requirements, and professional standards.
- Develop an informed and responsible strategy for AI adoption within legal practice.

Course Outlines

Day 1: Foundations of Artificial Intelligence in the Legal Profession

- Overview of artificial intelligence, machine learning, and generative AI in a legal context.
- How AI is transforming legal services globally.
- Capabilities, limitations, and risks of AI in legal decision-making.
- Common misconceptions about AI replacing lawyers.
- The evolving role of legal professionals in AI-enabled environments.

Day 2: AI in Legal Research and Knowledge Management

- AI-powered legal research platforms and tools.
- Case law analysis, precedent identification, and legal analytics.
- Knowledge management and document classification using AI.
- Accuracy, bias, and reliability in AI-assisted legal research.
- Practical examples and guided demonstrations.

Day 3: AI in Contract Management and Legal Drafting

- AI applications across the contract lifecycle.
- Automated contract review, clause analysis, and risk identification.
- AI-assisted drafting and document standardization.
- Managing confidentiality, data security, and client information.
- Case studies from corporate and commercial legal practice.

Day 4: Ethics, Regulation, and Legal Risk of AI

- Ethical duties and professional responsibilities when using AI tools.
- Accountability and liability considerations.
- Data protection, privacy, and intellectual property implications.
- Overview of emerging AI regulations and compliance requirements.
- Developing internal policies for responsible AI use in legal practice.

Day 5: Strategy and Implementation of AI in Legal Practice

- Assessing organizational readiness for AI adoption.
- Selecting AI tools aligned with legal and business objectives.
- Integrating AI into existing legal workflows.
- Managing change, training, and stakeholder expectations.
- Measuring impact, efficiency gains, and legal risk.
- Open discussion and course wrap-up.

Why Attend This Course: Wins & Losses!

- A lawyer-centric understanding of artificial intelligence without technical complexity.
- The ability to adopt AI strategically and responsibly.
- Stronger decision-making when evaluating AI vendors and solutions.
- Improved efficiency while preserving legal judgment and client trust.
- Positioning as a forward-thinking legal professional.

Conclusion

The Artificial Intelligence for Lawyers: Strategy, Ethics, and Legal Practice course provides legal professionals with the insight, judgment, and confidence required to navigate AI adoption in a rapidly evolving legal landscape. Over five structured days, participants develop a practical understanding of how artificial intelligence affects legal work, professional responsibility, and regulatory compliance.

More than a technology overview, this program empowers lawyers to make informed, ethical, and strategic decisions—ensuring they remain effective, relevant, and trusted advisors in an AI-driven legal environment.
